

# Horizontal Blast Cleaning Machine Blastrac 500E Global (Modular)

Shot Blasting

Electrical Motor  
400-440-480V /  
50-60Hz / 63Amp

To Push

Working Speed:  
1-15ml/min

Weight: 650kg

UNDERGROUND

- Steel
- Concrete
- Stone
- Asphalt
- Other

## Blastrac 500E Global Modular Shot Blaster

Working width: 500mm  
 Blasting capacity: up to 35-50m<sup>2</sup>/h on Steel up to SA 2,5  
 Working areas: Horizontal steel surfaces inside storage tank bottoms and outside tank roofs in petrochemical industry and shipyards  
 Wheel power: 18,5kW  
 Scope of supply: Blastrac 500E Global horizontal steel blaster / Blastrac dust collector BDC-655 or BDC-854 / Suction hose / Users manual /  
 Options: Blastrac Steel shot or grit  
 Please contact your Blastrac Expert for more details

## Main assets:

- Modular construction: allows the machine to be disassembled to pass through a Ø 600mm storage tank access hatch
- Closed circuit, dust free, when connected to an appropriate dust collector Blastrac BDC-655 or BDC-854
- Electrical drive system
- Independent drive for each rear wheel
- Ergonomic design and user's friendly control panel
- Increased productivity, reduced maintenance costs
- Fast and efficient removal of coatings, paint, rust, mill scale...
- Abrasive consumption < 200 gr/m<sup>2</sup>

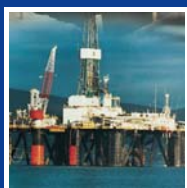

## Industry working areas

Petrochemical

Shipyards

Offshore
