

# BP-10

## Shot Blasting Machine

The BP-10 is designed for medium-to-large jobs including industrial plant and warehouse floors, parking garages, and bridge or ship decks. The BP-10 is an electric, self-propelled machine with a 10" blast pattern. The BP-10 operates on 460 V, 3-phase power. The BP-10 is based on a tried and true design, offering robust construction and industry leading productivity. When coupled with the BP-5-54 dust collector, the BP-10 is a spectacular option for your surface preparation fleet without sacrificing quality, durability, and operator comfort.

### SPECIFICATIONS

Production Capacity:	+up to 1,500 ft <sup>2</sup> /hr
Blast Pattern Width:	10"
Travel Speed:	0-100 ft/min
Blast Motor:	10 hp
Voltage:	460v, 3-phase, 60 hz
Amperage:	11.8 A
Weight:	730 lbs
Dimensions (LxWxH):	63" x 17" x 40"
Power Cord:	55 ft.

### FEATURES AND BENEFITS

- Finger tip speed and reverse control
- Easily accessible panel controls
- High-torque DC ground drive
- High speed, heavy duty bearing unit
- Precision manufactured liner package

BP-5-54

Recommended dust collector  
(see separate data sheet for specifications)

+Production rates will vary between material being removed and from job-to-job. This production rate represents production values under ideal conditions.
